Portfolio: <https://timothy-frontend-portfolio.vercel.app/>

Frontend Developer skilled in JavaScript, TypeScript, React, Next.js, Tailwind CSS, Firebase, and REST API integration. Experienced in building responsive web applications with reusable components, authentication, state management, database functionality, and maintainable frontend architecture. Built and deployed applications using Clerk, Zustand, Firestore, Stripe, GSAP, and browser APIs.

Professional Experience

Skintrix AI

[Remote](#) | July 2026

Frontend Developer Intern

- Completed a deadline-driven virtual internship focused on building the frontend workflow for a demographic-analysis web application.
- Implemented browser-based webcam and image-upload functionality, providing users with two methods for submitting images.
- Integrated APIs to submit user data and images, retrieve demographic results, and display age, gender, and race predictions.
- Built responsive interfaces with Next.js, TypeScript, Tailwind CSS, and GSAP, including loading, validation, error, and navigation states.
- Structured reusable components and centralized API logic while documenting progress through daily end-of-day reports.

Dean B. Ngo, MD

[Westminster, CA](#) | February 2025 – March 2026

Medical Receptionist

- Scheduled patient appointments and managed front-desk operations to support efficient patient flow.
- Assisted patients with insurance verification and addressed billing-related questions.
- Responded to calls, directed inquiries, and coordinated communication between patients and medical staff.
- Maintained accuracy, professionalism, and confidentiality while handling patient information.

Projects

Summarist: [Live Demo](#) | [Github Link](#)

Book-summary platform

- Built a responsive book-summary platform that enables users to discover, read, and listen to condensed book content. Developed reusable components, authentication flows, protected content, dynamic book pages, and subscription functionality while maintaining a consistent experience across desktop and mobile devices.

Netflix Clone: [Live Demo](#) | [Github Link](#)

Netflix-inspired web application

- Developed a responsive streaming application using React, Vite, Tailwind CSS, Zustand, Clerk, and the TMDB API. Implemented authentication, dynamic movie data, reusable media components, loading states, and centralized state management to recreate a modern streaming-platform experience.

Voiceprint AI: [Live Demo](#) | [Github Link](#)

Hackathon Writing Analysis Platform

- Collaborated on a three-person team to build Voiceprint AI for a hackathon challenge. Developed a writing-analysis platform that enables users to create a writing profile, compare new drafts with their established style, and review writing consistency. Contributed to the Next.js frontend, authentication flow, responsive interface, navigation, loading states, and presentation of results.

Technical Skills

Languages: JavaScript, TypeScript, Python, HTML, CSS

Frameworks and Libraries: React, Next.js, Tailwind CSS, Zustand, Redux, GSAP

Backend and Services: Firebase, Firestore, Clerk, Stripe, REST APIs

Tools and Deployment: Git, GitHub, Vite, Visual Studio Code, Vercel, Figma

Concepts: Responsive Design, Component-Based Architecture, State Management, Authentication, Dynamic Routing, Form Validation

Education

California State University, Long Beach

[Long Beach, CA](#) | [August 2025 – Present](#)

Bachelor of Science in Computer Science | Expected June 2029

- Major GPA: 4.0/4.0
- CSU Future Scholars Scholarship Recipient, Spring 2026
- President's Honor List, Spring 2026

Frontend Simplified Program

[Remote](#) | December 2025 – July 2026

- Completed structured coursework in JavaScript, TypeScript, React, Next.js, responsive development, and component-based architecture.
- Built hands-on applications using HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS, and Vite.
- Applied routing, state management, API integration, debugging, and performance optimization across multiple projects.
